SOLID WOOD FURNITURE

Chromatic aberration

All products are taken in kind. Due to factors such as light and display, there may be slight differences between the actual object and the picture. The trees grow naturally. The influence of the environment may also cause uneven wood color, which may be unavoidable. If you mind, please be careful to order.

Cracked

Because the wood used is all natural solid wood, the wood contains more or less water. Due to the principle of swelling and shrinking, the spliced solid wood will crack. It cannot be avoided; but we upgraded the splicing technology while greatly reducing the cracking situation, it still retains the characteristics of pure solid wood furniture; of course, the cost and material cost are also relatively increased, thus the price will be higher than before.

Wood grain scars

Because what we used are all natural solid wood, the scarring of trees is inevitable during the growth process, and the wood grain is the same. There are no two trees that are exactly the same in the world, which will also cause different textures. All we used are pure solid wood, so this aspect cannot be avoided for the time being, please also be aware.

Solid wood furniture is made of natural wood, which has natural attributes. Although the material selection process is strictly, the natural attributes in the above picture cannot be avoided. This is not a quality problem.

Care and maintenance

Cleaning and maintenance of furniture surface

At intervals, use cotton silk with 90% dry to wipe the dust off the furniture, and then use a clean dry soft cotton cloth to dry it. Avoid using alcohol, gasoline, detergent or other chemical solvents to remove stains. If there are stains on the surface of the furniture, use warm tea or milk to gently remove the stains. Do not use brute force.

Avoid scratches by hard objects

In daily life, try to avoid hard objects such as cleaning tools and tableware from touching the furniture to avoid knocking injuries.

Avoid humid environment

In summer, if there is an indoor tide, it is advisable to use thin glue to separate the parts of the furniture in contact with the ground, and at the same time, keep the furniture against the wall with a distance of 0.5-1 cm.

Keep away from heat

In winter, place the furniture at a distance of about 1M from the heating stream. Long term high temperature barbecue is easy to cause local dry cracking and deformation of wood, also will cause local deterioration of paint film.

Avoid direct sunlight

Should try to avoid the outdoor sunlight for a long time on the furniture, when the sun is strong, transparent gauze curtains can be used to isolate the direct sunlight, which will not affect the indoor lighting also have a protect for the indoor furniture.

Avoid dragging furniture

When moving the furniture, lift the furniture and then move it. Do not drag it directly on the ground to prevent the structural parts of the furniture from cracking.

LEATHER-UPHOLSTERED FURNITURE

* 产品表面面料轻微褶皱可通过拍打抚平!

Chromatic aberration

All products are taken in kind. Due to factors such as light and display, there may be slight differences between the actual product and the picture, and the length of use of leather products will also affect the color. Leather products will also cause color differences due to the transportation conditions of the place of production. The above are normal phenomena and cannot be avoided, please also be aware.

Leather folds

Because of the difference in the production process of leather products, when sewing, different sewing workers, different sewing skills, speed, and strength will cause differences in the lines and stitch length of a certain part, so it is normal to have wrinkles.

Odor

Non spot goods will be arranged to manufacture after we get the purchase order, which may have no deodorizing treatment performed. After our factory finish the produce, the goods are packaged and send out immediately. There will have some leather odor after you receive the goods, which is a normal phenomenon and is harmless to humans.

The above situation is an inevitable defect of leather furniture.

Care and maintenance

Water stains or mildew

Moisten the cloth with soapy water and wring it dry and wipe off the mildew or water stains on the leather.

Marks of ink or ballpoint pen

Put a few drops of clean water on the dirty place and clean it with a soft eraser.

Oil stains

It can be wiped with a dry soft cloth, the remaining oil can be slowly dissipated by itself, or it can be cleaned with detergent. Remember not to clean oil stains with water.

Remove odor

First, clean the sofa as a whole with a damp towel (semi dry). You can use lemonade or pineapple for deodorization. Lemonade can wipe the leather part of the sofa twice a day. Wiping it for about a week will gradually reduce the smell. Using pineapple to deodorize the pineapple slices can be placed on the sofa, wait for the pineapple slices to run out of moisture, then wipe the whole sofa with clean water, and then ventilate. Both methods need to be carried out under ventilation and without strong light.

Cleaning and maintenance of furniture surface

When wiping, do not use a wet towel or damp cloth, generally use a dry cloth to wipe it. When wiping the sofa, alkaline cleaning solution cannot be used, as it will reduce the flexibility of the leather and cause wrinkles. Do not place the sofa in direct sunlight or near a radiator or stove, nor in a place where the air conditioner blows directly.

Avoid scratches by hard objects

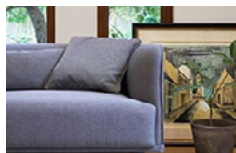

Take care to prevent the metal parts of shoes or leather from scratching the leather, and try to avoid pets approaching

FABRIC-UPHOLSTERED FURNITURE

Chromatic aberration

All products are taken in kind. Due to factors such as light and display, there may be a slight difference between the actual product and the picture, and the length of use of cloth and velvet products will slightly affect the color. This is a normal phenomenon and cannot be avoided, please also be aware.

The above situation will cause the color of the furniture to be inconsistent with the reference object after it is received, please understand.

(Studio shooting, outdoor light, lighting, different monitors)

Care and maintenance

Avoid humid environment

Pay attention to moisture, and place the product in a dry and ventilated place. In summer, if there is an indoor tide, it is advisable to use thin glue to separate the parts of the furniture in contact with the ground, and at the same time, keep the furniture against the wall with a distance of 0.5-1 cm.

Cleaning and maintenance of furniture surface

Use a clean cotton cloth, feather duster or special vacuum cleaner to clean the sofa; if you spill liquid, please use a soft cotton cloth to suck it up in time. And for the any residue, you can wipe it off from the periphery with a clean cloth dampened with a special dry cleaning agent.

Avoid direct sunlight

Should try to avoid the outdoor sunlight for a long time on the furniture, when the sun is strong, transparent gauze curtains can be used to isolate the direct sunlight, which will not affect the indoor lighting also have a protect for the indoor furniture.

Avoid scratches by hard objects

In daily life, try to avoid sharp objects scratching the cloth surface to prevent the sewing thread broken or products pilling.

Avoid high temperature

Do not put any hot drinks or food on the furniture.

MARBLE-MADE FURNITURE

Dark crack

The texture in the stone often show dark tones. It is due to the 'ne gaps in the stone, the stains will be brought into the stone by water stains settle down. This is a normal phenomenon and does not affect normal use.

Chromatic aberration

Pure natural, natural texture and luxurious texture are the greatest value of marble. For the marbles which with chromatic aberrations, we cannot say they are "defective product." Each piece of marble collected from nature is different. Its colors and textures are only similar, but not completely the same.

Scar

Natural marble will have blemishes, especially the appearance of stone scars in Jazz White. Before production, we have strictly controlled the quality to avoid such occurrences.

The above situation is an inevitable defect of marble furniture, and the size cannot be controlled

Care and maintenance

Keep away from sharp objects

Do not use sharp objects to touch the table surface, which may cause scratches on the surface. At ordinary times, attention should be paid to prevent heavy objects such as iron objects from hitting the stone surface, so as to avoid pits and affect the appearance.

Product luminosity

As the use time of marble increases, the luminosity will decrease; as the surface of black and white roots is extremely easy to oxidize, the luminosity of the product will drop faster than that. In order to maintain the luminosity of the product, customers can do a regular maintenance by asking a professional marble maintenance company to do it according to their own needs.

Waterproof and stain resistant

The marble surface is waterproof treatment, it certain waterproof and anti fouling capabilities. However, it should not be directly exposed to wine, soy sauce, tea and other substances for a long time. If you accidentally drop it on the countertop, you need to wipe it off as soon as possible to avoid penetrating into the countertop what may cause contamination of the countertop.

Clean the desktop

Do not use acidic or alkaline cleaning fluids to clean the tabletop, use neutral detergent or clean water
